

EFG-8000 OPTIONAL EQUIPMENT

REMOTE DIGITAL DISPLAY

EFG-RD1

Connects to the EFG-8000 gauge data outputs only.

Each remote display monitors one EFG-8000 gauge.

Alpha-numeric LCD display indicates gallons, Low level alarm condition, High level alarm condition, gauge diagnostics and absence of signal from gauge.

4 LED status indicators to draw attention to alarms.

Powered by 120v AC to 9V DC transformer (included).

Assembled in 4" diameter aluminum housing.

May be used indoors or outdoors under shelter.

EFG-420.1

GAUGE REMOTE DATA CONVERTER BOX with 4 RELAYS AND a 4-20mA output circuit to monitor the level of your tank.

Connects to the EFG-8000 data output. You can perform a wide variety of monitoring or control functions when connecting a EFG-420.1 to your gauge. Each converter monitors one gauge.

Each of the 4 relays is configured in a form C output. Various relay functions are available when ordering, contact us for details.

Externally powered by 12-24v AC or DC.

Designed for use inside control panels only.
